Information

Refer to paragraph 7.2 on page 7 of the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore whose investment objective is to achieve regular dividend payments and long term capital growth through investment in Singapore-listed companies and Singapore-related securities.
- Class SGD (denominated in SGD) and Class USD (denominated in USD) are currently available.
- It is the aim of the Manager to make quarterly distribution payments, however this will depend on the level of income generated during the period and the Manager’s discretion. **The making of distributions is at the absolute direction of the Manager and is not guaranteed. Investors should also note that any distributions made (whether out of capital or otherwise) may have the effect of lowering the net asset value of the Fund.**

Refer to paragraphs 5, 6, 1 and 6.2 on pages 5 to 6 of the Prospectus for further information on features of the product.

Investment Strategy

¹ The Prospectus is available for collection at Manager’s operating office during normal business hours

<ul style="list-style-type: none"> • The Fund will primarily invest in the securities of Singapore-listed companies and companies that are expected to benefit from development of Singapore as a regional financial and business centre, and the associated strong economic and social trends. • In constructing the Fund’s portfolio, the Manager will primarily invest in equity and equity related securities listed on the Singapore markets and opportunistically in the Asian markets. From time to time the Manager may also invest in securities of Singapore companies that are listed in other countries where the Manager believes those companies will benefit from the main investment themes that have been identified in the course of the Manager’s proprietary research and investment analysis. • The Fund will generally have an equity exposure of a minimum of 70% of its NAV and exposure to fixed income securities, money market instruments, deposits with financial institutions, and / or cash of a maximum of 30% of its NAV. • The Manager may use or invest in financial derivative instruments, in respect of the Fund for the purposes of hedging existing positions and efficient portfolio management. 	Refer to paragraph 6.2 on pages 5 and 6 of the Prospectus for further information on the investment strategy of the product.
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Manager is RHB Asset Management Pte Ltd. • The Trustee is HSBC Institutional Trust Services (Singapore) Limited. • The Custodian is The Hongkong and Shanghai Banking Corporation Limited. 	Refer to paragraphs 2.1, 3.1 and 3.2 on pages 2 to 4 of the Prospectus for further information on these entities.
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	Refer to paragraph 10 on pages 10 to 14 of the Prospectus for further information on risks of the product.
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risks. Prices of securities that the Fund invests in may be affected by circumstances such as political or economic events. • You are exposed to country risks. Prices of securities that the Fund invests in foreign markets may be affected by risks specific to that foreign country, such as changes in the country’s economic fundamentals, social and political stability, currency movements and foreign investments policies. • You are exposed to credit and default risks. The downgrading of a rated debt instrument or adverse publicity and investor perception could decrease the value and liquidity of the debt instrument. An economic recession may adversely affect an issuer’s financial condition and the market value of debt instruments issued by such an entity. The issuer’s ability to service its debt obligations may be adversely affected by specific issuer developments, or the issuer’s inability to meet specific projected business forecasts. All this may impact the valuation of the Fund or result in the Fund experiencing losses. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Fund is not listed and you can redeem only on Dealing Days. There is no secondary market for the Fund. All realisation forms should be submitted to the Manager or its authorised agents. • You are exposed to the liquidity risks of investments. Circumstances such as limited free-float shares or due to small capitalisation companies where stocks trade less frequently and in smaller volume would make a security difficult to sell in an open market. 	

Product-Specific Risks

- **You are exposed to equity risk.** The performance of the equities held by the Fund is dependent on company specific factors like the company's business situation. If the company-specific factors deteriorate, the price of the specific equity may drop significantly and permanently.
- **You are exposed to the regulatory risk.** Any changes in national policies and regulations may have an effect on the capital markets in which the Fund is investing.
- **You are exposed to currency risk.** Units held by the investor or a security held by the Fund is denominated in a foreign currency which fluctuates unfavourably against the SGD, the investment in the Fund may face currency loss in addition to the capital gains/losses. This may lead to a lower NAV.
- **You are exposed to interest rate risk.** In the event of rising interest rates, prices of debt instruments will generally decrease and vice versa. Meanwhile, debt instruments with longer maturities and lower coupon / profit rates are more sensitive to interest rate changes.
- **You are exposed to derivatives risk.** The Fund may engage in transactions in financial derivative instruments (or derivatives), such as options and futures transactions, swaps, forward contracts, credit derivatives, spot foreign exchange, caps and floors, contracts for differences or other derivative transactions for hedging and efficient portfolio management purposes. Although derivatives are often used to minimize risk, derivatives have their own kinds of additional risks, such as: (i) the use of derivatives for hedging purposes may not be effective; (ii) some derivatives may limit the Fund's potential for gain, as well as for loss; (iii) the cost of entering and maintaining derivative contracts may reduce the Fund's total return to investors; (iv) the price of a derivative may not accurately reflect the value of its underlying Asset; (v) there is no guarantee that a market will exist when the Fund wants to buy or sell a derivative contract; (vi) exchanges may set daily trading limits on certain derivative contracts. These could prevent the Fund from closing a contract; and (vii) volatility and counterparty risk.

Other risks to your investment include the risk of exceptional market conditions, acts of institutional investors, regulatory risk of funds, liquidity risk of derivatives, failure of brokers and other depositories, reliance on Manager, indemnity risks, possible adverse tax consequences, cross class liabilities and realisation risk.

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

The prices of Units will generally be available 2 Business Days after the relevant Dealing Day and may be obtained on Bloomberg or by contacting the Manager at +65 6323 2508.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

- You can exit the Fund on any Dealing Day by submitting a realisation form to the Manager or its duly authorised agent. If applicable to you and you wish to exit the Fund within the cancellation period of 7 calendar days from the time of your subscription, you may do so by submitting a cancellation form and you will not incur the subscription charge and charges stated above. However, you will have to take the risk of any price changes in the NAV of the relevant class of the Fund since your subscription and pay any bank charges, administrative or other fee imposed by the relevant agent or distributor.
- The Manager may limit the total number of Units of the Fund to be realised on any Dealing Day to not exceed 10% of the total number of Units of the Fund or Class (as the case may be) then in issue (disregarding any Units which have been agreed to be issued).
- You will normally receive the realisation proceeds within 6 Business Days after the relevant Dealing Day on which your realisation form is received and accepted.
- The realisation price of your Units is determined as follows:
 - If you submit the realisation form by 3 p.m. Singapore time on a Dealing Day, you will be paid a price based on the NAV of the Fund as at close of business in the last relevant market to close on that Dealing Day.
 - If you submit the realisation form after 3 p.m. Singapore time on a Dealing Day or on a day not being a Dealing Day, you will be paid a price based on the NAV of the Fund as at close of business in the last relevant market to close on that Dealing Day.
- The net realisation proceeds that you will receive will be the realisation price of the Fund multiplied by the number of Units realised, less any charges. An example is as follows:

1,000.00 Units	X	SGD0.9000	=	SGD900.00
Your realisation request		Realisation price		Gross realisation proceeds
SGD900.00	-	SGD9.00	=	SGD891.00
Gross realisation proceeds		Realisation charge (1%)		Net realisation proceeds

Refer to the paragraphs 12, 14 and 15 on pages 16 to 20, and 21 of the Prospectus for further information on valuation and exiting from the product.
